♒ Aquarius  
Legs

✕ Place the feet.

To know where the Sign is, first find the day of the  
Month, and against that day you have the Sign or Place  
of the Moon in the 6th Column. Then find it here, and  
it shows you the place of the Body it governs.

# JANUARY hath 31 Dayes

William	31650	1689	Feb. 13.	Whom God preserve for a	
Mary	21662	1689	Feb. 13.	Terror to Evil Doers.	

The Throne's not Vacant now; but fill'd with those  
That Murder none Nay! hardly hang their Foes,  
Mercy is God-like; of Him Nations sing,

A brave, bold Prince, not a poor running King.

Sent when you wanted, to prevent your spoil,

And by that Hand preserv'd in all his toyl,

Heaven's Union far out does the Parson's Oyl.

Some few Lines by another Hand, we shall leave to  
the Interpretation of Time, & the Intelligent  
R E A D E R.

I.

When Tybers Brackish streams combine,  
To mix their waters with the Slime,  
And both do strive to stop the Rhine  
Cedars shall stoop to court the Vine.

II.

After thick clouds the Welkin clears, (   
And Albion long-night mard with fears, (   
With a Serener Look appears. (   
Let her be Loyal and Quiet at home  
And then despise the Arts of Hell and Rome.

III.

Wait but a while and the long Floating Ark,  
Arrives and Shipwracks Peters forged Bark,  
The Scarlet Strumpet that so rag'd with Ire,  
Shall see her putrid Flesh consum'd with Fire.  
The Dis-Branch'd Olive joyn'd to Jesses Root,  
Brings forth on Jordans Plains Redoubled Fruit.

IV.

Now fond Opinions vanish, Factions cease,  
And the World hugs in Universal Peace.  
From Heaven Lustres returns, and doth possess  
All Japhets Spreading Sons with happiness.  
Swords turn'd to Plow-Shears, all that was amiss  
Remov'd gives place unto a General Bliss,  
But who, O who! shall live when God doth this (

# Of the Eclipses this present Year, 1693

**F**our times this Year shall the two Luminaries be Eclipsed. Namely, twice the Sun, and twice the Moon, whereof the first, which will be of the Moon, will only be visible to us here in New-England, if the Weather permit, which happeneth upon *Wednesday*, the 11th of *June* 7, 27 min. past 11 at night, it begins about three quarters of an hour past nine, and ends about a quarter past 1, and shall be totally Eclipsed, it is Celestialled in 3 degrees of *Leo*, in a sign of the fiery triplicity, and as it is said, that generally after an Eclipse or male configuration of Planets in the fiery Trigon, it hath been observed, that Wars have succeeded, Slaughter of Men, Rapines, Murders, Towns Castles, Forts, Besieged, depopulation sometimes of whole Countries, Villages and Provinces; and these are signified to be more violent, if an Eclipse happen in a time of present War. If such a defect happen in a peaceable time, it incites many dangerous Contentions, many tedious Law-Suits, much variance amongst vulgar persons, even concerning trivial grounds. Sometimes Tumults happen, Insurrections in several Counties or Counties against their Magistrates, when little or no cause is given.

The Second Eclipse will be of the Sun upon

the 23 of June, 22 min. past 7 in the morning, which  
 in Egypt will be a great Eclipse; but to us in-  
 visible, its in the Tropick of Cancer: sig: tropica sig-  
 nificant mutationem Regis legum, morum, &c. The  
 Tropick signs signifies a change of the air, laws,  
 manners, &c. faith *Dyspodius*. And *Prochus* saith  
 In secundo cancri, fluctus & Fontes succedat inconsti-  
 tutionem & Perulantiem, Mortalibus Incontinentiam. It dry-  
 eth up rivers and fountains, and stirreth up wan-  
 tonness and incontinency among the People...  
 Perhaps those places that are under the influ-  
 ence of these signs wherein these Eclipses hap-  
 pen will be sensible of their effects.

Under the sign Cancer are Scotland, Arcadia,  
 Burgundie, the lower Holland, Zealand, Russia,  
 Numidia, Africa, Babynia, Phrygia, Celchis, Car-  
 thage, Cities and Towns. Constantinople, Tunis,  
 Bona, Gema, Luca, Risa, Millam, Vincenza,  
 Berne, York, S. Andrews, Lubbeck, Magdeburg, Wir-  
 temberg, Gnydeck, &c. Under Leo, are Gallia, Foggia, the Alpes, Ita-  
 ly, Sicily, Apulia, Bohemia, a part of Turke, Ebe-  
 nicus, Caiden, Cities and Towns, Damascus, Sy-  
 ramsa, Rome, Ravenna, Gremont, Ulms, Const-  
 ante, Pragus, Lintz, Gremisum.

The third Eclipse will be of the Moon, the  
 7th of July, Gemini past 6 in the morning, in  
 25 degrees of Cancer.

The Fourth Eclipse will be of the Sun, the  
 16 of December, 4 min. past 8 at night, in six  
 degrees of Capric, neither of them visible to us  
 Of the Sums Digest to 1692.

We begin our Astronomical Observations for

the Year ending from the Sun's Ingress into  
Capricorn, December 10. 48 min. past 2 After-  
noon, at which time, *Saturn* hath most essential  
dignities in the Angle, succeeding the place of  
the Sun, and *Mercury* in the Ascendant, which  
Planets do denote to stir up cold, and windy,  
and frosty weather, but forasmuch as *Mars* is  
hastening out of *Sagittarius* into *Capricornus*,  
the Home of his Exaltation; he may also have  
a share in the Government of this Quarter, and  
may somewhat allay or mitigate the cold influ-  
ence of *Saturn*. The Moon also being Essen-  
tially dignified, being in *Taurus*, the House of  
her Exaltation, and triplicity, may also claim  
a share in the Government of this quarter, and  
may cause various sorts of Weather as she  
comes to be Aspected with the other Planets,  
sometimes cold, and sometimes cloudy, and  
sometimes Windy, and perhaps often inclining  
to Snow, Rain, Hail, Falling Weather.

#### *Of the Spring Quarter.*

The Spring Quarter begins when the Sun  
enters *Aries*, which cometh to pass this year,  
on *Thurs(ay)*, *March* the ninth, 29 min. past 2  
Afternoon, at which time, 20 degrees of *Leo*  
will be upon the Ascendant, in which Sign the  
Sun hath most Essential Dignities; and the An-  
gle succeeding the place of the Sun, is the tenth  
house, 10 degrees of *Taurus*, upon the Cusp  
thereof, where *Venus* and the Moon hath most  
Essential Dignities. These three Planets, viz.  
the Sun, *Venus* and the Moon may challenge  
the

the greatest share in the Government of this Quarter, but forasmuch as the Planet Mars is covering into Pisces his Triplicity, he may also claim a share in the Government of this Quarter. Now as touching the Weather, signified by these Planets, we may probably have a dripping Spring, but not without sometimes Blustering Winds, and Thunder Showers: also the Moon, who is said to signifie the Commonalty, being in Virgo, in the Ascendant, very well dignified in her Triplicity, and increasing in light and motion denoteth their good and prosperity, if the evil Conjunctions and Aspects of the malignant Planets impede not.

*Of the Summer Quarter*

The Summer quarter begins when the Sun enters Cancer, which happens this year on *Saturday, June 10.* at 38 min. past 4 afternoon.

This Summer may prove more wet then the last, but perhaps not without more frequent Thunder Showers, as it is likely will happen.

*Of the Autumn Quarter.*

The Autumn Quarter, begins when the Sun enters Libra, which is this year, on *Tuesday, September, the 12.* 20 min. past 8 in the morning. This quarter perhaps for the most part may prove pretty moist, especially in *October, and November,* but not without now and then a Frosty Morning occasioned by a North-west Wind, coming after Wet weather, and if it should chance to be very cold and frosty weather about the beginning of *December,* when the Sun joyns in Conjunction with Saturn, yet after wards when the Sun is removed further

further from him, it may prove more moderate, the rest of the Winter, of which expect not an account of at this time. Besides the Conjunction of Saturn, and Mars, the first of December, 1692. in 15 degrees of Sagittarius. In this year (viz.) April the 22 day Saturn and Jupiter make their third and last opposition, Saturn being in 21 16 of Sagittarius and Jupiter in 21 16 of Gemini: And there is also an Opposition of Saturn and Mars in July, Saturn in 16 degrees of Sagittarius and Mars in 16 degrees of Gemini: The places where the effects hereof will be most apparent, writers do assign  $\Pi$   $\nearrow$   $\text{IX}$  under  $\times$   $\Pi$  is Brabant, Flanders, Lombardy, Cities under are, London, Lorraine, Bruges, Norimberg, Mentz.  $\Pi$  Under the Sign are, Greece, Africa, South-west parts of France, S. Christophers in the West-Indies, Virginia: Cities under Virgo are, Paris, Lyons, Tolouse, Basil in Switzerland, Heidelberg. Under Sagittarius, of Kingdoms, Spain, Hungary; Countries, Moravia, Dalmatia, Slavonia, some parts of the Low Countries: Cities, Toledo, Narbon, Siegen, Buda, in Hungary. Under Pices are, Calabria, Portugal, Normandy; Cities, Rheims, Ratisbon, Worms, in many of these Kingdoms, Countries or Cities the Effects of the aforelaid Conjunction and Oppositions of the three Superiour Planets may be manifested in one kind or other more or less, &c.

*A Brief discourse of the Natural Causes of Watry Meteors, as Snow, Hail, Rain &c.*

You must first Understand, that all Watery Meteors, as Rain, Snow, or such like, is but a moist Vapour drawn up by the Vertue of the Sun, and the rest of the Planets into the middle Region of the air, where being congealed or dissolved, upon the earth, as hail or rain,

## OF THE RAIN-BOW

*Pliny* saith, the Rainbow is made by the Sun's beams striking upon a hollow cloud, when their edge is repelled and beaven back against the Sun & thus ariseth variety of colours by the mixture of clouds, air and fiery light together, but as he saith it pretendeth neither fair nor foulweather.

## Of Rain.

Of these kind of meteors you may read *Aristotels Libris Primo Meteor. Lib. 1. cap. 1. and 2.* But briefly, rain is a cold vapour and earthly humour, raised from the earth and water, into the middle Region of the air, whereby the extremity of cold, it is thickned into the body of a cloud, and after being dissolved, falleth upon the Earth.

## Of Hail.

Hail is ingendared of Rain, congealed into ice, freezing thidrons presently after the dissolving of the cloud, whereby we have great irregularities fall on the Earth.

## Of Snow.

Snow is of the same humour that rain is, but not grown together so hard. *Pliny* saith hail sooner melteth then snow, and the hail cometh sooner in the day than in the Night.

## Of Frost and Dew.

When in the day time through the faint heat of the Sun, there is a cold & moist vapour drawn up a little from the earth, presently at night it descendeth again upon the earth, and is called dew, and in the Spring or Harvest, it is a sign of

of fair weather, but if by means of cold it be congeald, it is called Frost, and therefore Dewes come not so often in hot seasons, neither when winds be up, but after a calm and clear night, Frosts dry up wet and moisture: for when (as *Pliny* saith) the ice is melted, the like quantity of water in proportion is not found.

### Of Wind

Wind is nothing but many Exhalations driven from the earth, and inforced laterally above the Sun.

### Of sudden Blasts.

A Windy exhalation being thrown down, & encompassed (as *Pliny* saith) in a thin course of clouds, newly over cast, coming at some time with such a violence as it bursts and cleaves a dry cloud in sunder, and makes a storm; of the *Greeks* called *Eusepias*, but when this clef is not great, but that the winds be forced to turn round, and roll his descent without Lightning, there is made a whirl-puff, or gulf called *Typhon*. That is to say the storm *Eusepias* sent forth a winding violence, and this wind doth bear many things away with it, changing from place to place but if the hole in the cloud were great, it is called *Torbo*, casting down, and overthrowing all that is next it, *Pliny* saith *Eusepias* cometh with snow nor no *Typhon* from the South, some say, Vinegar thrown into this wind, breaks the gulf.

### Of Earthquakes

Plenty of Winds gotten in the Bowels, holes, and Caves of the earth, bursting out of the Earth, and  
the
